CONTRACT MINING AND MISCELLANEOUS SERVICES

Carey Mining's First Project – which continues to this day

Since the commencement of mining at Sunrise Dam in 1995, Carey have been involved in numerous site activities with the core tasks being the management of Load and Haul from the pit floor, ROM Operations and Crusher feed. Operations at the mine have continually been carried out with Carey Mining partnering with a large Tier 1 Contractor to deliver the mining service to the owners of the operation. The most recent contract (2014-2019) is performed via a 50/50 Joint Venture between Carey and Downer.

From 1 July 2019, Carey Mining took over from the Joint Venture providing services including:

- Full management of all mining operations and maintenance
- Movement of over 640,000 tonnes of ore per month

- Recruitment, engagement and management of over 50 site based personnel

Carey's operations at the Sunrise Dam have received numerous awards for Safety from the Client.

The project has consistently provided training and employment for Aboriginal people from the Goldfields region, with 50% of Carey's employee commitment to the Joint Venture being Indigenous.
